

## Decorative shapes of capsules

## Capsules for peroral purposes

## Custom Production

Upon customer's request the company Noventis is in position to manufacture any soft of gelatine capsules providing that they satisfy the basic technologic attributes necessary for this type of packaging. Consistent application of principles of proper production practice - so called GMP - to which our company holds a licence - is absolute necessity and a commonplace.

- The material to be filled into capsules has to have water-repelled character, i.e. cannot contain substances that are dissolvable in water nor water itself.
- The filling has to be completely homogenous, elements size of max. 50 µm is allowed in case of suspensions.
- Substances or suspensions intended for capsules have to be stable throughout the whole expiry period.

Soft gelatine capsules can be produced in a wide range of shapes, capacity for both peroral and decorative purposes. All shapes of capsules could be produced in any colour and shapes, which chemical composition complies with valid legislative norms. Capsules could be manufactured in transparent or opaque style.

We also offer filling of hard peroral forms in bulk (e.g. capsules, tablets, pellets...) into retail packages and their finalization.

Modern production-technologic procedures and facilities are used in the production process. All processes comply with strict laboratory checking procedure.

Type	Filling/g	Weight of cover/g	Weight of capsule/g	Number of pieces in 1kg/pcs.
Penguin	1,589 - 1,637	0,623 - 0,746	2,213 - 2,366	422 - 469
Delphin	2,515 - 2,823	0,837 - 0,931	3,352 - 3,683	270 - 298
Turtle	1,848 - 1,922	0,820 - 0,929	2,675 - 2,811	355 - 373
Duck	1,969 - 1,990	1,057 - 1,241	3,025 - 3,225	310 - 330
Star	1,968 - 2,045	0,952 - 1,163	2,967 - 3,152	317 - 337
Hedgehog	0,974 - 0,997	0,890 - 1,145	2,886 - 3,126	319 - 346
Heart 75	3,800 - 4,500	1,500	5,300 - 6,000	167 - 189
